SUMITH K SAM

DevOps Engineer | Python/Django Developer

Kochi, Kerala, India +91 7356098543 sumithsam77@gmail.com linkedin.com/in/sumith-k-sam-338998227

PROFESSIONAL SUMMARY

DevOps Engineer with 2.5 years of software engineering experience in Python and Django development, currently focused on cloud infrastructure automation, CI/CD pipelines, and container management. Combines strong back-end development expertise with hands-on skill in Docker, Kubernetes, Terraform, Ansible, Jenkins, and AWS to build secure, reliable, and automated application delivery pipelines.

TECHNICAL SKILLS

Cloud & Infrastructure: Amazon Web Services (AWS EC2), Terraform (IaC), Ansible, Linux Administration, Bash Scripting
Containerization & Orchestration: Docker, Docker Compose, Kubernetes (K8s), ArgoCD (GitOps)
CI/CD & Automation: Jenkins, GitHub Actions, Git, SonarQube, Cron Jobs
DevSecOps & Security: OWASP ZAP (DAST), Trivy, Semgrep (SAST), TruffleHog, Bandit, Safety, Kyverno
Development & Frameworks: Python, Django, FastAPI, REST APIs, HTML5, CSS3, JavaScript, DTL
Databases & Tools: PostgreSQL, MySQL, SQLite3, MLflow, Miro, MS Office

PROFESSIONAL EXPERIENCE

DevOps Engineer
October 2022 – Present
Zoople Technologies PVT LTD — Kochi, Kerala

- Leading DevOps initiatives, infrastructure automation, and continuous integration/continuous delivery (CI/CD) pipelines.
- Managing cloud deployments on AWS, containerizing applications with Docker, and orchestrating deployments using Kubernetes and ArgoCD.
- Implementing DevSecOps practices including automated vulnerability scanning, static code analysis, and policy enforcement across build pipelines.

Python / Django Developer (2.5 Years Experience)
March 2022 – October 2024
Zoople Technologies & NextGen Pro Innovations — Kochi, Kerala

- Developed full-stack web applications using Python, Django, REST APIs, and database systems (PostgreSQL, MySQL, SQLite3).
- Integrated third-party services including payment gateways (Razorpay), user authentication, and automated notification services.
- Built scalable server-side architecture, optimized database queries (ORM), and structured modular application logic.

DEVOPS & INFRASTRUCTURE PROJECTS

GitOps & DevSecOps Platform for ML Inference Microservices
Technologies: FastAPI, Docker, Kubernetes, Jenkins, ArgoCD, MLflow, Python, Linux

Built an automated GitOps delivery pipeline deploying containerized FastAPI ML microservices to a Kubernetes cluster. Integrated Bandit and Safety into Jenkins CI for automated vulnerability scanning, with ArgoCD automating rolling deployments upon manifest updates.

Infrastructure Automation using Terraform and Ansible
Technologies: Terraform, Ansible, AWS EC2, Linux, YAML, SSH

Automated cloud infrastructure deployment and server configuration on AWS using Terraform and Ansible. Provisioned EC2 instances with Terraform and configured them using Ansible playbooks, demonstrating an Infrastructure as Code (IaC) workflow.

CI/CD Pipeline for Django Application

Technologies: Jenkins, Docker, Git, GitHub, AWS EC2, SonarQube, Argo CD

Designed and implemented an automated CI/CD pipeline for a Django application using Jenkins. Containerized the application with Docker, deployed it on AWS EC2, integrated SonarQube for code quality analysis, and implemented GitOps-based deployment via Argo CD.

AWS Cloud Monitoring Automation using Shell Scripting and Cron

Technologies: AWS EC2, Linux, Bash, Cron, AWS CLI

Developed a shell script to automate the monitoring of AWS EC2 instance resources and system health. Configured the script as a cron job to execute at scheduled intervals, collect system metrics, log resource utilization, and support proactive infrastructure monitoring.

Hardened Microservice & DevSecOps CI/CD Pipeline

Technologies: Jenkins, Docker, Kubernetes, OWASP ZAP, Trivy, Semgrep, TruffleHog, Kyverno, Git

Architected an automated DevSecOps CI/CD pipeline in Jenkins utilizing Docker-out-of-Docker architecture to enforce shift-left security. Integrated TruffleHog for secrets detection, Semgrep for SAST analysis, Trivy and Kyverno for admission policy validation, and OWASP ZAP for DAST scanning.

SOFTWARE DEVELOPMENT PROJECTS

OTRAVELGO (Python-Django)

Technologies: Python, Django, MySQL, Razorpay, HTML5, Bootstrap

Travel management platform enabling users to browse destinations, book flights/hotels/activities, and process secure payments via Razorpay. Features user authentication, booking history, and real-time status updates.

OKLINIK (Python-Django)

Technologies: Python, Django, Razorpay, SQLite3

Web application for online doctor appointment scheduling and consultation fee payment integration via Razorpay gateway.

OCOMPLAINTBOX (Python-Django)

Technologies: Python, Django, PostgreSQL

Campus complaint registration portal for students to submit, track, and manage administrative and facility issues.

OTEXTSUM (NLP using BERT)

Technologies: Python, BERT Algorithm, NLP

Text summarization system using the BERT transformer model for extractive text summarization to retain key content.

EDUCATION

Master of Computer Application (MCA)
Mount Zion College of Engineering (KTU) | CGPA: 7.99

B.Sc Computer Science
Mannam Memorial NSS College (MGU) | CGPA: 6.88

CERTIFICATIONS & DETAILS

Certifications: Full Stack Web Development (Python, Django)

Languages: English, Malayalam

Activities: NCC 'A' Certificate Holder, NSS Volunteer
